1. Claims 5-16 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It appears that the specification does not have sufficient structural support for the “two state sensor” and its function. As a result, it is unclear from the specification what “two state sensor” is. Is it a well known device with a well known structure or circuitry.

It also appears that the specification does not disclose what “a three phase distribution bay” and its function are.

2. Claims ~~5~~-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, it is unclear what “two state sensor” and its function is.

In claim 10, it is unclear what “a three phase distribution bay” and “a live element of the equipment” represent. Are they shown in any of drawings? On line 5, “said conductor” has no antecedent basis. It is also unclear how “said conductor” is interconnected and associated with the “three phase distribution bay” and the live element. Furthermore, it is unclear what “two state sensor” and its function are.

The dependent claims not specifically address share the same indefiniteness as they depend from rejected base claims.

3. Since claims are indefinite, no art has been applied to the instant claims 5-16.
4. Claims 1-4 are allowable since the prior art does not disclose a detailed method and apparatus for monitoring live equipment at high or medium voltage using a sensor unit placed on the equipment with a first antenna for producing a digital signal related to a determined physical parameter and a transceiver unit for emitting a radio wave to the first antenna in the sensor unit and for providing a signal related to the physical parameter as recited in the instant claims 1-4.
